The Australian Government, through the Mental Health and Suicide Prevention Plan, is expanding and implementing the Initial Assessment and Referral (IAR) tool in primary care. The IAR Guidance and Decision Support Tool (IAR DST) is a holistic decision-making framework that uses the stepped-care approach to assist general practitioners and clinicians in matching consumers with the most appropriate mental health services for their needs.

The PHN will be providing a unique opportunity for registrars to gain an understanding of the Initial Assessment and Referral (IAR) tool by using case studies and working with a psychiatrist to understand the clinical reasoning behind each step.

The platform used for this event will be Teams. You will receive an email with the joining link to this session the day before the event. This email will be sent to the email address you have registered with Eventbrite. Please ensure to check your spam folder. If you have any questions, please contact dharris@thephn.com.au,

For more information on IAR and IAR-DST please head to the PHN website.

By giving your details to attend this education session, you are consenting for your details to be shared with the presenters and sponsors.
