Rural Innovations Changing Healthcare (RICH) is a one day virtual forum linking rural health service providers, consumers and other rural sectors across NSW. The aim is to share experiences and showcase rural models of care which have potential for broader implementation.

The theme for RICH 2023 is A healthy harvest: reaping what we sow.

Presentations will showcase the positive health outcomes that can be achieved through planting seeds of innovation within the rural health sector and nurturing the service, the community and the workforce while they grow.
