The Children's Tumour Foundation welcomes you to attend the 2022 Australian Clinical Neurofibromatosis (NF) Symposium. Showcasing both Australian and international speakers. Together we will explore ground-breaking medical advancements and gain exclusive insight into the current projects from around the world, paving the way for a brighter future for all people living with NF. The occasion will be an opportunity for NF researchers, scientists, clinicians, specialists and health practitioners to come together in person and virtually. To allow people to attend from anywhere in Australia or around the world, we will also be streaming the event live for registered participants. For those attending in person there will be a networking event after the Symposium.

Speakers and topics include:

MANAGEMENT OF NF2

NF DIAGNOSTIC CRITERIA UPDATE

MaGeN UPDATE

THE STRUCTURE OF HUMAN NEUROFIBROMIN
