and [registration details](#)

The Immunisation Coalition's annual update on HPV in Australia for GPs, Immunisation Nurses, Pharmacists, and other immunisation professionals. With the latest facts about Human Papilloma Virus (HPV) and vaccination, this webinar covers everything you need to know about the disease and available vaccines.

A Certificate of attendance will be issued to attendance for 50 minutes or more. The event will be recorded and available on our website after the event.

This event is not accredited with RACGP or ACRRM – no CPD hours will be issued for attendance.

Moderated By Dr. Andrew Baird

Andrew is a General Practitioner in Elwood, Melbourne and a tutor in Professional Practice for medical students at University of Melbourne. He has a background in rural general practice. His interests are in general practice and medical education.

Presented by Angela Newbound

Angela Newbound is an Immunisation Education Consultant based in South Australia, and is a member of the Immunisation Coalition. She has been involved in immunisation program delivery in South Australia for over 20 years, originally as an immunisation provider and in program coordinator roles within the Divisions of General Practice, SA Health Immunisation Section, the Medicare Local Network and presently the Primary Health Network.
