This year's theme is Passion. Purpose. Influence. Impact.

The aim is to build on our strengths to improve the health and wellbeing of rural and remote Australians, especially for our First Peoples. By sharing experiences, learning together, and inspiring one another, we will foster passion, maintain purpose, build influence, and increase impact.

The CRANaplus Conference provides an opportunity for like-minded remote and isolated health individuals to network, connect and share. It serves as both a professional and social resource for Australia's Remote and Isolated Health Workforce.
