Join us as we discuss the NSW Alcohol Interlock Program & Fitness to Drive Medical Assessments.

Prof Kate Conigrave (Senior staff specialist, SLHD Drug Health Services & University of Sydney) will discuss the key aspects of the NSW Alcohol Interlock Program and the involvement of GPs and other health professionals in this drink driving offender program.

Following this, Dr Craig Sadler (Director Alcohol and Drug Unit/Withdrawal Services at the Calvary Mater Hospital in Newcastle), will provide a brief overview and discussion on medical assessments for fitness to drive and what role that medical professionals have in this program.

This seminar series is kindly sponsored this year by Indivior. Topics for the seminars are chosen by the Seminar Conveners.
