

COVID-19 Update for General Practice

WHEN Thursday, October 21st 2021
12:30 PM – 1:30 PM

WHERE Online

COST Free

With the recent lifting of the lockdown and several other public health restrictions, communities are being encouraged to normalise and accept the presence of COVID-19. This 'new reality' places a renewed focus on vaccination status and the broader management of the health of COVID-19+ patients in the community.

This session will discuss the role of GPs in providing effective health care for COVID-19+ patients, and the management of related health and workplace issues for general practices.
