Join APNA and subject matter experts from PainMedSA to learn all about chronic pain management in primary health care.

We will cover:

1. Integration of chronic pain
  - The how/when/what to say in conversations with your patients
  - GPMHCP and team care arrangements
  - The who/what/why of Multi D input
2. Red flags to look for
  - OMEDD – what is it and why it is important
  - The 5 A's
  - Further tools and resources
3. Role of practice nurse as advocate / liaison
4. Referral to pain specialists

- Why to do referrals and what to put in the referral to ensure a quality referral
