With the continuing increase in the number and severity of COVID-19 infections, and the rapid uptake in vaccinations, the demands on pharmacists and pharmacy staff are rising. Please join us for this update discussing the the most recent information on the COVID-19 vaccines, pharmacy run vaccine clinics and the multiple considerations for infection prevention and control for pharmacies.

Discussion topics will include:

- Vaccine efficacy (Vaxzevria formerly Astra Zeneca & Moderna) and dose intervals
- Adverse Events Following Immunisation (AEFI) counselling
- PPE use for vaccination and for pharmacy staff in general
- Cleaning & Infection Prevention & Control practices with patients
- Business continuity if a positive COVID-19 case has been in the pharmacy
- Examples of Pharmacy run vaccination clinics
