This webinar provides training for senior staff of health service provider organisations on the requirements for handling data breach incidents under the Data Breach Notification Scheme (DBN Scheme) of the Commonwealth Privacy Act.

The course provides industry-specific training, addressing obligations and scenarios specifically in the context of health services. It equips participants with a detailed understanding of:

- the DBN Scheme requirements;
- governance mechanisms required to meet obligations;
- how prompt remedial action can prevent notification requirements being triggered;

- how to apply scheme requirements in real-life scenarios;
- issues to address in supplier and client contracts.

Other dates available.
