The meaningful use of digital health in Australia is underpinned by healthcare organisations connecting to the Healthcare Identifiers service. This four-part webinar series will provide managers of medical practices, community pharmacies and other healthcare organisations with an understanding of the foundations of digital health and how to put in place the pre-requisites required to connect to digital health services (such as electronic prescriptions, My Health Record and secure messaging). This session, 'Registering a Seed Organisation with the HI service', is the third in the series and will cover the steps required to obtain a HPI-O (healthcare provider identifier - organisation) and successfully register the organisation with the Healthcare Identifiers service.
