The Primary Health Network Digital Health team is pleased to showcase a range of innovative Digital Health tools that will transform your practice by saving you both time and money while supporting your patient's healthcare journey.

This education event will expand your knowledge of digital health technologies available to specialist practices, focusing on adopting and using My Health Record. The digital health tools being showcased have the ability to improve access to healthcare information, support practice workflow and enhance patient care. The team will take you through the foundational requirements for these tools and where you can access them.
