Attendance at this meeting will allow the participant to proceed to a RACGP approved 40 point clinical audit program. Presented by Dr Vicky Chang MBBS BSc(Med) FRACP (respiratory and sleep physician) the learning objectives are:

1. Identify signs and symptoms that indicate a need to adjust pharmacotherapy in moderate COPD
2. Determine appropriate strategies to provide early optimisation of therapy in patients with moderate COPD
3. Examine the clinical evidence behind pharmacological strategies for the reduction of exacerbation risk in patients with moderate COPD
