

# New advances in Lymphoedema Mapping, Detection and Management for GP's - Webinar

**WHEN** Wednesday, May 1st 2024  
7:30 PM - 9:00 PM

**WHERE** Online

**COST** Free

The increasing rates of cancer survivorship has led to GPs having to deal more and more with the sequelae of cancer surgery and adjuvant therapies in our patients. Lymphoedema is often a troubling consequence of such treatment. With new technology, the assessment and management of lymphoedema has changed. GPs have an important role to play in diagnosing and facilitating treatment for lymphoedema sufferers
