The Healing the Healers retreat is designed especially for doctors who are worn out and in need of a time of rest and renewal. Led by Dr Claire Noonan and Dr. Amy Imms, participants will explore new skills and psychological strategies to implement when facing life challenges, as well as enjoying a variety of movement classes, creative writing, great food, and other fun activities in a peer group environment. Come and connect with other doctors, enjoy a chance to relax and step away from the pressures of your everyday life and work. We hope participants will be inspired and reinvigorated, perhaps re-entering work and life with some new strategies at hand to sustain their wellbeing.
