COST Free

Educational visits: The program includes face-to-face or virtual educational visits to GP practices.

Educational visits are available as a one-on-one, or in a small group and are designed to:

- support GPs in the early diagnosis of heart failure.
- provide clinical guidance on initiation and up-titration of heart failure medicines.
- provide resources for GPs to empower patients with effective self-management strategies to improve their quality of life.

Visits are accredited by the Royal Australian College of General Practitioners (RACGP) and the Australian College of Rural and Remote Medicine (ACRRM).

Free on-demand webinars and case study (CPD accredited)
