

# ~ Hepatitis C in NSP Settings

**WHEN** Thursday, December 1st 2022  
10:00 AM – 12:30 PM

**WHERE** Online

**COST** Free

This free training aims to provide participants with the confidence to initiate conversations around hepatitis C in the needle and syringe program (NSP) setting. Frontline workers in NSP settings have a crucial and unique role to play in eliminating hepatitis C. Every day you're talking to people who might be living with hepatitis C, and in these conversations you can support people to protect their health. This free online workshop will help build your confidence to initiate conversations around hepatitis C in NSP settings and provide referrals to testing and treatment.
