Primary care providers can play a critical role in the elimination of hepatitis C in Australia by 2030.

This free 1.5 hr interactive session provides practitioners in primary and related care settings with an overview of the hepatitis C management in primary care settings, including case finding, testing, patient assessment and treatment. Presented by Dr Nada Andric, GP, Haymarket Foundation

Learning Outcomes

Identify priority populations for HCV screening; Order and interpret tests appropriately to diagnose chronic HCV infection; Describe the recommended pre-treatment assessment; Demonstrate understanding of antiviral therapy for treatment of HCV; Communicate confidently with patients about HCV.

Due to the transition to the new RACGP triennium, this activity's accreditation is pending. Participants will need to self-record this activity via Quick Log through their RACGP myCPD dashboard. Your Statement of Attendance will include a breakdown of hours and activity types.
