This session aims to increase GP awareness and confidence identifying patients for hepatitis C testing and treatment.

Learning outcomes:

- Identify people for testing, including both priority and undertested population groups and how to initiate conversations
- Be aware how to easily test, treat and manage people living with hepatitis C in general practice
- Identify when/how to prescribe hepatitis C treatment and when to refer for specialist care
- Be aware of available tools to support and increase confidence when initiating testing, treating, and managing people living with hepatitis C in general practice.
