Join this upcoming webinar for the latest updates on the human papillomavirus (HPV) vaccine, including an in-depth look at the use, effectiveness and safety of the vaccine.

An expert panel will discuss the updated delivery schedule for Australia and its implications for vaccine delivery, as well as offer tips for maintaining high vaccine coverage. We will also discuss initiatives designed to eliminate cervical cancer globally.

Leading researchers and policy experts will present on:

the HPV vaccine and its impact in Australia and globally

a roadmap for cervical cancer elimination in Australia and our region

changes to the Australian HPV vaccination schedule and their implications

initiatives designed to maintain high levels of HPV vaccine coverage.
