We will be presenting details about some of the key IBD guidelines available for GPs, a new IBD summary guideline and the training to be released in the coming months. The webinar is free-of-charge but registration is essential.

IBD GP Aware stems from a priority area identified in the Federal Government's IBD National Action Plan to support GPs to more effectively participate in IBD management through awareness and a suite of education resources and continuing professional development.

GP Aware is led by Crohn's & Colitis Australia with consortium partners the Gastroenterological Society of Australia (GESA) and the Australian General Practice Accreditation Limited (AGPAL). The project is funded by the Australian Government Department of Health.
