Hosted by the Heart Foundation in partnership with the World Heart Federation, this webinar will seek to explore the latest evidence on the management of high cholesterol in the context of cardiovascular risk reduction.

Our international expert panel will discuss:

- Update on the mechanisms and role of new and emerging lipid lowering therapies
- How to titrate and combine pharmacological lipid lowering therapies to optimise management
- Strategies to identify and address non-adherence
- Complimentary dietary and lifestyle counselling for people with hypercholesterolaemia
- What general practices can do to champion CVD prevention and implement structured screening program
