The ACSEP Management of Sports Trauma (MOST) Course combines current theory and a practical approach to equip medical professionals with the core skills needed to manage traumatic sporting injuries, on and off the field. Highly practical and interactive, this comprehensive two-day course addresses common emergencies that might confront a healthcare or medical professional, covers the rationale behind treatment choices and the adaption of medical management at sporting events and out in the field. MOST Course is CPD approved by the Australasian College of Emergency Medicine.
