The VHI Cardiology Masterclass has an expert faculty lined up to summarise the latest research and clinical practice updates over 10 modules. The modules are:

- Assessment of patients with chest pain (Dr Adam Nelson)
- Acute and chronic management of ischaemic heart disease (Dr Adam Nelson)
- Management of cardiovascular risk factors (Prof Steve Nicholls)
- Assessment of patients with dyspnoea (Dr Esther Davis)
- Acute and chronic management of heart failure (Dr Esther Davis)
- Management of valvular heart disease and aortic syndromes (Dr Hui-Chen Han)
- Acute and chronic management of atrial fibrillation and flutter (Dr Hui-Chen Han)
- Assessment of patients with palpitations and management of tachycardia (Dr Hui-Chen Han)

- Assessment of patients with syncope and management of patients with cardiac devices (Dr Hui-Chen Han)
- Management of patients after cardiac procedures (Dr Hui-Chen Han)

Our program was designed specifically with Primary Care Physicians in mind and our evidence-based presentations have a strong focus on providing practical advice with plenty of time for Q&A so you can gain the specific knowledge you require. Attendance is not limited to General Practitioners, so if you have an interest in the modules outlined above, we welcome you to enrol. Students with a specific interest in Cardiology are also welcome to enrol.

The one-day masterclass is completely online, allowing attendance from anywhere in Australia. This education is a CPD Activity under the RACGP CPD Program and 12 CPD Program points will be allocated upon completion.
