Are you interested in hearing more about COVID-19 vaccine safety? Or need more information to support your patients in making decisions? Perhaps friends, family or colleagues are asking questions or you are still unsure and want more information? In this next NCIRS webinar:

- learn about the US experience of COVID-19 vaccine safety monitoring and assessment of benefits compared with risks
- hear about the latest COVID-19 vaccine safety data for children, adolescents and young adults
- get an update on thrombosis with thrombocytopenia syndrome (TTS) following Vaxzevria (AstraZeneca) COVID-19 vaccine and myocarditis and pericarditis after mRNA COVID-19 vaccination
- consider the risks and benefits of COVID-19 vaccination and learn strategies for discussions with your patients, friends and family.
