9:00 AM - 4:30 PM

WHERE Online

COST \$200

Hear from leading international expert Prof Anthony Bateman, who with Peter Fonagy, developed Mentalization-Based Treatment (MBT) for borderline personality disorder (BPD). MBT is an empirically-supported treatment for people with borderline personality disorder. It offers positive outcomes for people with complex and multifaceted presentations and a high degree of comorbidity. Prof Bateman will also virtually present two post-conference workshops: 'Principles of Structured Clinical Management* for BPD' and 'MBT for Antisocial Personality Disorder' and will co-present the 'MBT for BPD' workshop for participants who would like to access more in-depth training in MBT.
