

Optimising your Practice Data to identify patients at risk of Cardiovascular Disease and assist in driving patient care - Mastermind

This Mastermind will assist General Practices in identifying their patients who are at risk of Cardiovascular Disease through the use of their data and a Cardiovascular Dashboard Report. We will go through the benefits of this report and how it can be utilised to drive patient care and ideally assist in reducing the risk of Cardiovascular Disease in the community. It will also show you what support we can provide your practice in the area of Heart Health.
