Developing novel solutions to meet the needs of people living with dementia and their carers.

People with dementia and carers in the ACT report feeling “ping-ponged” between services and have challenges accessing appropriate and timely post-diagnostic dementia care. Therefore, novel solutions are needed to meet the needs of people living with dementia and their carers.

In this webinar Dr Nathan D'Cunha will:

Describe the current gaps in dementia services offered in the ACT region;

Present results of a hospital-based trial of a twelve-week multi-component rehabilitation program for people with dementia and their care partners;

Discuss the ongoing development of a co-designed, short, targeted, at-home allied health dementia program.

Each of these service delivery initiatives heavily rely on Allied Health Assistants.
