

# Progressive Chronic Kidney Disease: stages 3&4

**WHEN** Tuesday, August 22nd 2023  
7:30 PM - 8:30 PM

**WHERE** Online

**COST** Free

Health Professionals, join Kidney Health Australia and Professor Kevan Polkinghorne, for this case study-based webinar that will not only underline the importance of the early detection of CKD, but will also unpack evidence-based guidelines that can slow the progression of CKD, as well as guide the management of complications like bone mineral disease, pruritis and restless legs syndrome as the condition progresses. In fact, early detection and intervention has been shown to reduce the progression of CKD and its complications. RACGP / ACRRM CPD EA - 1 hour, applied for.
