

RSV vaccines and treatments for infant disease prevention - NCIRS Webinar

WHEN Tuesday, February 27th 2024
12:00 PM – 1:00 PM

WHERE Online

COST Free

Join our webinar on respiratory syncytial virus (RSV), which will explore new vaccines and treatments to reduce the incidence and impact of RSV in infants.

Our panel of leading infectious diseases and immunology paediatricians and physicians will present on:

- RSV symptoms and disease burden in infants
- new RSV vaccines and treatments, including monoclonal antibodies
- next steps for RSV vaccines and treatments in Australia.
