and [registration details](#)

The online course includes examination of different body systems, showing you how to get the most out of each examination. It will also cover legalities and safety tips along the way, so you can be highly effective while also practising safe telemedicine.

The program will take up to 6 hours to complete and is broken into the following components.

2 hours: Self-paced online modules
2.5 hours: Review of clinical skills video resources in module 3
1.5 hours: Virtual live interactive workshop with two clinical educators (max 20 people)
