In this webinar we will explore gaps, opportunities and advice relating to vaccinating people with disability. Our expert panel will present data on vaccine coverage for people with disability before discussing vaccination service gaps for people with disability. We will then share essential tips and present practical strategies for vaccinating people with disability in your clinic.

Leading researchers and clinicians will present on:

- vaccine coverage and vaccination service gaps for people with disability
- ways to support vaccination of patients with complex needs, including patients with intellectual and developmental disabilities and those with needle fear
- new NCIRS resources to support healthcare providers in vaccination.
