Vaccine Virtual Days are coming on March 30th & 31st 2022. This event will be a unique opportunity to connect with the broader vaccine community with a focus on adult immunisation. The value and importance of adult immunisation has been discussed globally over the last 12 months. Now is the time to come together as a community of healthcare professionals committed to adult immunisation, to hear the latest science and data on vaccine technologies, barriers to immunisation, including hesitancy to vaccinate, and much more.
