Join us on for our next OTAC Clinical Case Webinar. In this session, we will examine cases around chronic pain management and OAT, including for those who are already receiving OAT and when it may be appropriate to consider providing OAT for a patient with chronic prescription opioid use.

Leading the session is Prof Apo Demirkol, Senior Staff Specialist of Drug and Alcohol Services & the Prince of Wales Hospital Pain Management Centre in South Eastern Sydney LHD, and Conjoint Professor in the School of Public Health and Community Medicine at UNSW.

You can submit your questions for the webinar within your webinar registration, or use the chat function within Zoom during the session. This Q&A webinar will be recorded and be made available on the OTAC website (www.otac.org.au/webinars) alongside other relevant resources.
